

Wickey PRO

Commercial playground equipment

„We love creating **unforgettable memories** for our guests.“

„We have found a great partner in Wickey. The advice was friendly, polite and very accommodating. The assembly of the devices needed some helping hands but was easily possible with the supplied instructions. The quality is also very good and children have fun with the equipment. As a father and the operator of the public playground, I have complete confidence in these products because the workmanship and the safety features inspire confidence. Many thanks to the Wickey team. When we expand our playground, we will get in touch with you again.“

Thomas Kelting from Ludwigsmoos

PRO MAGIC Pride

Quality, safety and trust

- ✓ **Years of experience**
- ✓ **Designed in Germany**
- ✓ **Durable construction**
- ✓ **Solid wood from Europe**

Here are 6 reasons why Wickey is the right choice:

We strive to develop high-quality, safe and durable playground equipment that meets the individual needs of our customers. With years of experience and a wide range of products, we are guaranteed to find the perfect playground equipment for any location.

Customised playgrounds

From small units to extensive models, we offer a wide range of playground equipment that can be assembled according to the space available and specific customer requirements.

5-year guarantee

Our durable and safe products are built to last, ensuring that your investment remains a reliable source of play and fun for years to come. Because we trust in our quality, we grant a 5-year warranty³ on all wood, stainless steel and HDPE parts.

High-quality and environmentally friendly materials

In order to provide children with long-lasting fun, the responsible development and manufacturing of our products plays a major role. As a natural material, European solid wood gives our play equipment its character. For the coloured elements we use HDPE made from up to 80% recycled materials.

Excellent value for money

Our playground equipment offers outstanding value for money, allowing you to make a long-term investment in high-quality playground equipment that meets your requirements.

Expert support

Our expert team is always on hand to answer any questions and support you every step of the way.

Fast delivery

We offer delivery within 4 weeks so that your project can come to life as quickly as possible.

³ The advertised 5-year guarantee applies to all wooden, stainless steel and HDPE parts on climbing frames and swings for public use if our anchors have been used accordingly throughout the service life. In any other case, the two-year statutory warranty applies. Further information regarding the scope of the warranty and its enforcement can be found in our guarantee declaration.

„We would definitely shop here again and the nice thing is that the playground can always be expanded now. Children who come to our facility are so enthusiastic.“

This year, we at the DTC84 (tennis club in Düsseldorf), have decided to change/convert the rear area of our grounds. Of course, a children’s playground for our little spectators/guests was essential. We went looking for suitable playground equipment on the internet. As the playground is financed by donations, it was important to us to achieve good value for money (equipment for public use is much more expensive than equipment for private use) and to provide as large a selection as possible. The equipment also needed to fit in well with our asso-

ciation visually. We then came across Wickey, where a large selection of climbing frames and playground equipment awaited us. We decided on a lovely climbing frame with a slide, a swing, a seesaw and a gymnastics bar. The colours blue and yellow match our club logo perfectly and the playground looks simply fantastic in place. Wickey was also always helpful with advice and questions. Just great. We would definitely shop here again and the nice thing is that the playground can always be expanded now. Children who come to our facility are so enthusiastic.

Caroline Begemann

DTC84 (Tennis club in Düsseldorf)

Diverse needs – individual solutions

We are proud that more than 5,000 customers have already used us and have been won over by our professional service.

Campsites

A playground can be an important attraction for families with children. Investing in a playground for your campsite will attract more customers and strengthen your reputation as a family-friendly destination.

Restaurant/Hotel

A safe playground makes a visit to your restaurant or hotel more attractive for families. Not only does it provide entertainment for the children, but it also allows parents to use your services for longer.

Landscape planner

A well-designed playground can create individual play areas that are both functional and visually appealing, adding value to your projects.

Parks and recreational facilities

With a safe and stimulating place to play, bespoke playgrounds can attract families and meet the needs of the community while increasing property values in the area.

School/kindergarten

Find a well-designed playground solution for your school or kindergarten that provides a safe and stimulating place for children to play, enhances their development and improves learning.

Housing complex

A playground near a housing complex offers residents a valuable opportunity for active recreation and promotes social interaction among children - while parents can let them play without worry.

Quality that lasts

We believe that quality and durability are the cornerstones of our products and that the use of the most excellent materials and manufacturing processes is essential to achieve this goal. We understand the importance of shaping a sustainable future for our children and we want to do our part to protect the world they live in.

Durable materials

Our playground equipment is made of pressure impregnated solid wood and HDPE elements, which consist of 80 % recycled materials. This ensures that our products withstand the elements and maintain their quality over time.

✓ Natural resources

Our playground equipment is mainly made of the natural material wood and is therefore not only durable, but also nature-friendly.

✓ 5-year guarantee*

We trust in the longevity and quality of our wood. That is why we offer our customers a 5-year warranty*.

✓ European origin

We source the majority of our wood from domestic forests in south-eastern Germany.

* The advertised 5-year guarantee applies to all wooden, stainless steel and HDPE parts on climbing frames and swings for public use if our anchors have been used accordingly throughout the service life.

What characterises our wood?

Wood is a natural and sustainable raw material that not only offers a natural look but is also particularly durable outdoors. During the growth process, each tree develops its own characteristic features. Typical wood characteristics such as knots and grains make each piece of wood unique, which in turn gives our playground equipment its individual character.

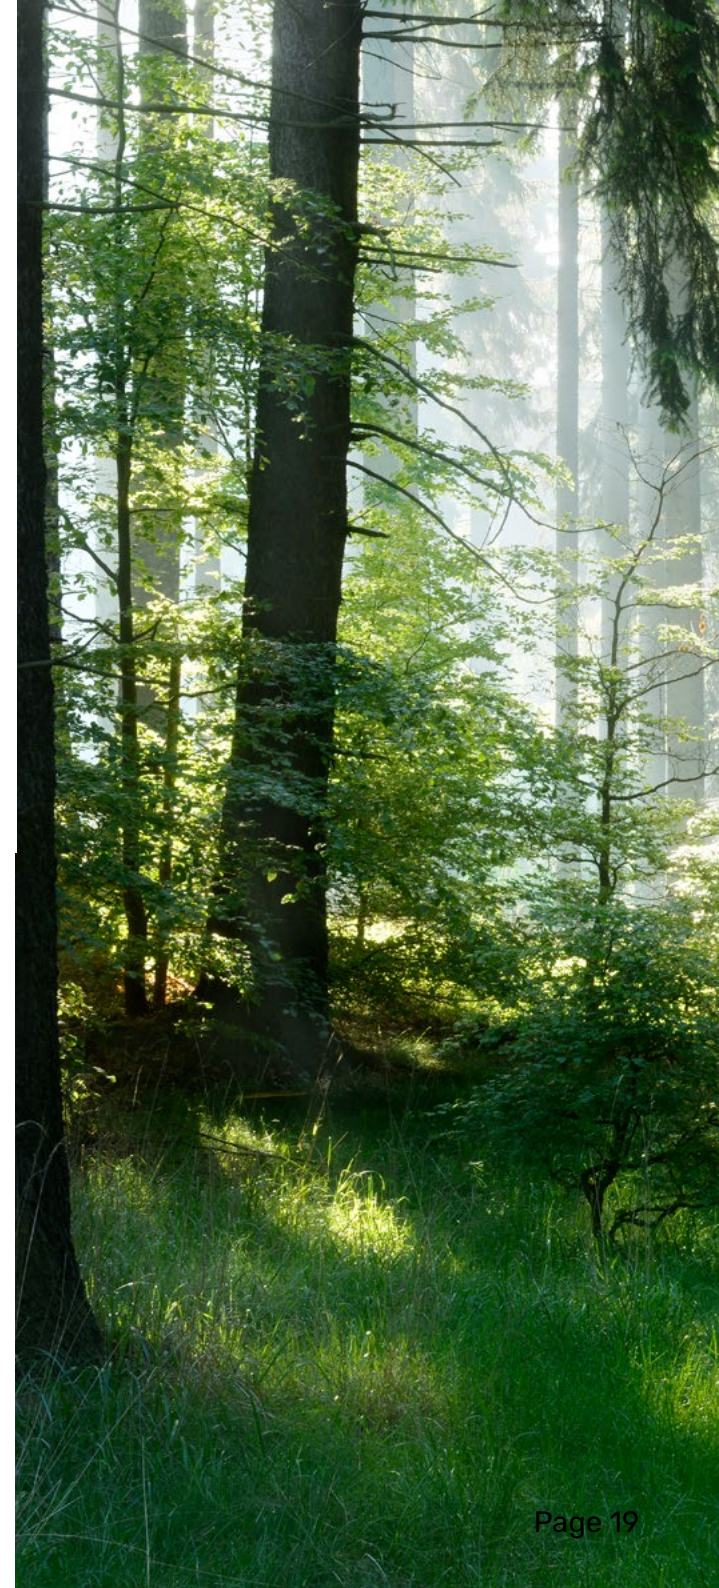

Where does our wood come from?

We place special emphasis on the quality and responsible use of our wood. Most of our wood comes from domestic forests in southeastern Germany. For our playground equipment we use impregnated pine or spruce wood.

Why impregnated wood?

Wickey has deliberately chosen pressure impregnated wood - which is used in the professional and public sectors - for its many advantages. Impregnation ensures special durability in outdoor areas and is biologically harmless for humans, animals and plants.

- ✓ **No tedious sanding and annual painting**
- ✓ **Increases the life span of the wood**
- ✓ **Protects against weathering, rot, mould and fungi**
- ✓ **Saves effort, time and money**

Personal advice

We are proud that **more than 5,000 customers** have already used us and have been won over by our professional service.

Our goal is to help you select the optimal playground equipment that meets both the needs of your customers and the requirements of public playground design. We offer comprehensive advice to ensure that your project is successfully implemented.
